

Forsyth County Schools Interim Assessments

In Forsyth County Schools we strive to look at multiple measures of data to determine student progress toward meeting standards. In an effort to gather additional information to inform classroom instruction, Daves Creek Elementary School will administer Interim Assessments. These assessments will be administered as regular classroom assessments.

The results of the assessments will be used by classroom teachers to determine standards students have mastered as well as those standards where students may need additional support. These assessments are not graded. The results will be used to assist teachers in understanding individual student's progress and to allow students to set individual learning goals.

Forsyth County Schools promotes a Balanced Assessment Program where emphasis is placed on an ongoing collection of evidence through classroom assessment to inform instruction. If you have any questions about the Forsyth County Schools Interim Project, please contact the office of Teaching and Learning at 770-887-2461.
