

TEACHING AS A PROFESSION CAREER PATHWAY

Explore an Essential Career Field

*Complete the Program and earn College Credit

- Do you love kids?
- Are you passionate about sports and interested in coaching?
- Are you interested in finding a career that is meaningful?
- Are you bilingual?
- Do you hope to be a parent some day? (The most important person in a child's education is their parent.)

Teaching is an essential component of most careers. Training new employees, explaining concepts to clients, and being able to communicate ideas clearly are key components of most careers. The Teaching as a Profession program is geared toward future teachers but would be beneficial for students going into many careers.

3 CLASSES COMPLETED IN 2 YEARS

COURSE 1

Explore careers in the field of education, while also getting opportunities to partner with local schools on projects such as read-alouds, science days, and creating virtual resources.

COURSE 2

Explore current issues in education, analyze areas that need to change, and continue to partner with local schools in creating educational resources and working with students.

COURSE 3

Complete an internship at a local school. You will be off campus at your placement 4 days a week partnering with a mentor teacher, planning lessons, and working with students.
