Join us for online learning and fun! Here's what we are offering:

- Access to Championship Chess [World of Chess](#) with videos, activities, puzzles and challenges that reinforce online class material, as well as our online Training Games and Game Play that provide a practice arena for improving play.
- Access to all weekly Archived Classes and a weekly class syllabus to help students review the previous week's material and to prepare for the upcoming week's class through links to videos and activities.
- Once students are playing full games, they are invited to participate in focused, practice tournaments, following each day's final class (4:35PM).
- Throughout the session, there will be online scholastic tournaments, rated and unrated, free and for pay, in which our students will be invited to participate.
