

itslearning FAQs for Parents

1. What is itslearning?

itslearning, which replaces ANGEL, is Forsyth County Schools' new personalized online learning system.

2. What can I do as a parent?

In itslearning parents monitor student progress and view content assigned to their child. Parents have one login to view multiple children. Examples of what is available to parents in itslearning include a list of student tasks with due dates, a report showing how well their student is keeping up with class work, a view of the teacher's planner, and a secure messaging system to communicate with their child's teacher.

3. How do I get there?

Go to <https://forsyth.itslearning.com> or visit your school's web site for the link. Parents login with their ParentPortal username and password. If you do not have a ParentPortal account, visit your school's front office to setup your account. Please bring a photo ID for activation.

4. Do I still need to go to ParentPortal?

Yes, for 2013-14 parents will access ParentPortal to view grades and attendance for their child. In the future, this feature will be integrated into itslearning.

5. Where can I find more information?

Visit <http://vimeo.com/71456463> to watch a three minute video tour of itslearning designed for parents.
